## 1. Introduction

The nations & regions GDP will represent their comprehensive strength in views of economy level and quality, so searching it may have an important effectiveness for us to process statistic with the national producing amount every month, season and year. In the meantime, the value with y-y has also a significant meaning that reflects the economy growth step because we should clarify the increasing change so as to evaluate

the increasement and declination value precisely. The positive y-y value may mean the good and rapid economy developing status whilst the minus one may state the bad and slow economy step. So we judge the economy developing enhancement and decrease through that y-y value for a certain period. Thereby, the detail discussion will include in the following aspects. The GDP which indicates national economic status has

provided an important role in every aspect in the world. So that the population increasing rate would be maintained for the sake of raising high-technique product with the entire industrial chain constantly which might enhance our new-quality-productivity. Hence we should consider the effective factors for example the population quantity, new quality productivity with high-technique etc. like big plane electric vehicle battery AI robot quantum computer medicine making disease diagnosis AI(artificial intelligence) ocean source space exploration nuclear generator 5G communication etc. other ones. Low population enables to offer high life & quality with improving GDP per capita value. Meanwhile, it can enhance the national whole GDP value and help us to boost the economic recovery and many things to do. So the certain population is about to improve our national confidence some degree and make us to become priority one as early as possible even the super-country to lead the world to leadership right.

In contrast, the GDP increasing rate may play a significant role with regulating population increasing rate mutually and cooperatively. Hence the two aspects may be emphasized and paid attention to in thriving the whole national economic developed degree through enough wielding our generations positively and efficiently by our government institution endeavor and evaluation. For the sake of making relevant policies and allocating capital into the necessary industries the corresponding strategic plan needs to be made under various background and entities. Then the according monitor and estimation will be followed and estimated periodically and frequently by the observer in government's institution. At last as to the developed speed in one nation the corresponding population increasing quantity and high-technique product producing will be discussed and considered more precisely and correctly according to the near past years experience and variation. [1~25]

## 2. Discussions

### 2.1 The 2026 QS global universities' Subjects

On March 25, the 2026 global advance education analysis institution QS (Quacquarelli Symonds) normally released 2026 QS global universities rank. The 2026 QS global universities' Subjects might show 4~1 and subjects amount ranking 35~52 by Tongji University~Zhejiang University respectively in terms of Figure 1 explained their high academy level.

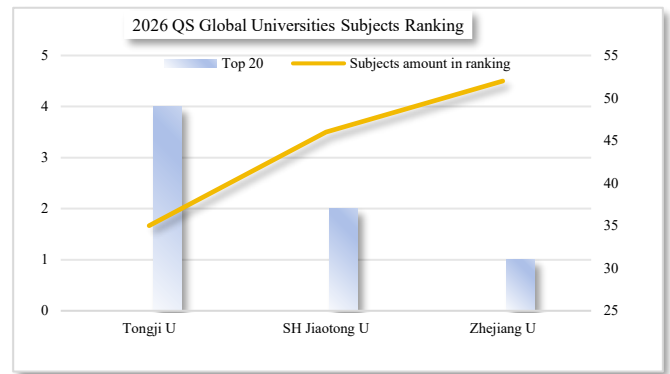

Figure 1 The 2026 QS global universities' Subjects. [1]

The 2026 QS global universities' Subjects might show 1 and subjects amount ranking 41~1 by Beijing Normal University~Nanjing Agricultural University respectively in terms of Figure 2 explained their forwards academy level.

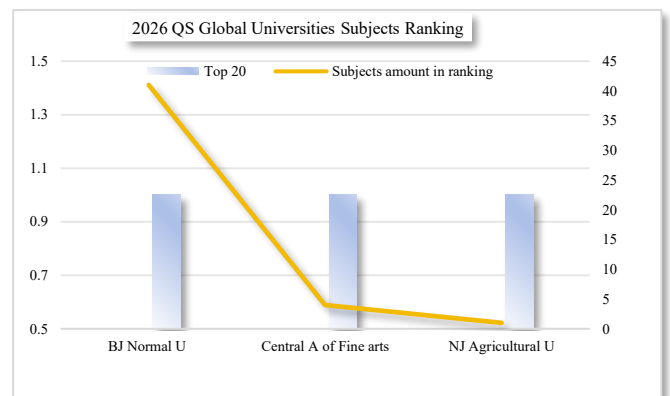

Figure 2 The 2026 QS global universities' Subjects I. [1]

At the end, the 2026 QS global universities' Subjects might show the subjects amount ranking 47~25 by Zhongshan University~Renmin University of China respectively in terms of Figure 3 explained their high academy level.

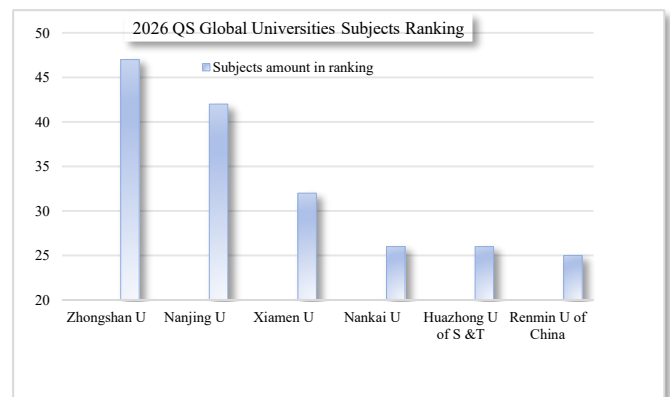

Figure 3 The 2026 QS global universities' Subjects II. [1]

### 2.2 Introduction to the Archives of Engineering and Technology

Our mark will be DOI: 10. 59657/aet-2026. As to the Dr& Professors, Greetings from. We have recently come across your impressive works and believe that your expertise would greatly enrich our journal. I appreciate your

professionalism and knowledge after a view at your recent articles. We welcome the manuscript and it was our immense pleasure to feature in our upcoming issue. Hope you kindly forward the manuscript below website. If you are unable to submit by our Online Submission, you can directly forward your unpublished manuscript to this Email as an attachment. It is noted that the deadline for submissions is April 15<sup>th</sup>, 2026. Please submit your (in 150 words), Research interest to join our editorial board. Please Note If you want to be an Editorial board membership. The eligibility is minimum PhD (doctor of philosophy) or MD(medicine doctor) I am looking forward to receiving from you hopefully and sincerely. We are delighted to invite you submitting your cherish paper to us cooperatively and beneficially. [2]

### 2.3 Subject for the Journal of Robotics and Automation Research

Dear Doctor & professors kindly respond to us. I hope this message finds you well. We were pleased to publish your article, “The Dynamics on Hammer with Three Freedoms and Friction Vibration by Lagrange Equation in Robotic Arm”, in Journal of Robotics and Automation Research (JRAR). It was a valuable contribution to our journal like it. I would like to kindly invite you to share your next unpublished work for consideration in an upcoming issue. You may submit your manuscript directly by replying to this email, and we will guide you through the review process. Thank you again for your contribution, and I look forward to the possibility of working with you on your future research. We are delighted to invite you submitting your cherish paper to us cooperatively. [2]

### 2.4 <Game theory tutorial> cited numbers

The cited numbers of <Game theory tutorial> within 2010~2013 might show 67~8 in 2010~2013 respectively to exhibit many citations with 67 referring to that book in 2010 and then the declining phenomenon until 2013. The new book anticipating novel degree would play an important role that year.

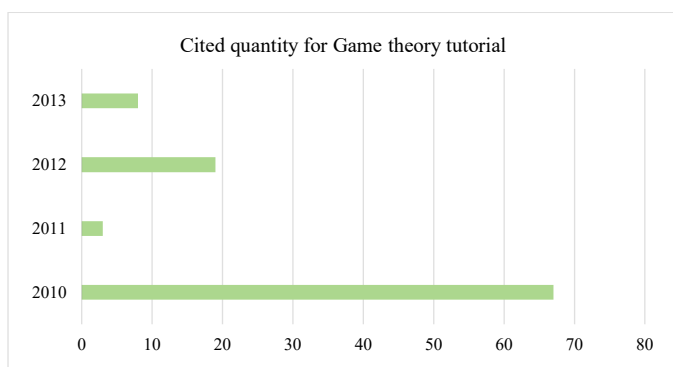

Figure 4 The cited numbers of Game theory tutorial within 2010~2013. [3]

### 2.5 Guangdong cities GDP per capita changes

The Guangdong cities GDP per capita might show 5 & 4 thousand yuan by Jiangmen & Huizhou cities in 1992 accordingly in terms of Figure 5 to exhibit their moderate economy status. The y-y value might show 24% & 33% by them respectively explained their fastest development steps.

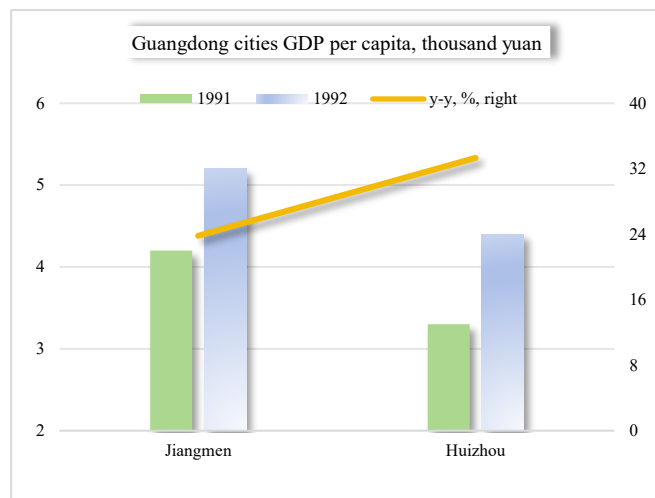

Figure 5 The Guangdong cities GDP per capita [4]

The Guangdong cities GDP per capita might show 3 thousand yuan both by Shantou~Shaoguan cities in 1992 accordingly in terms of Figure 6 to exhibit their moderate economy status. The y-y value might show 22%~20% by them respectively explained their fastest development steps. In contrast, the Zhaoqing city maintained 2.8 thousand yuan with y-y value 16% with modest strength & step.

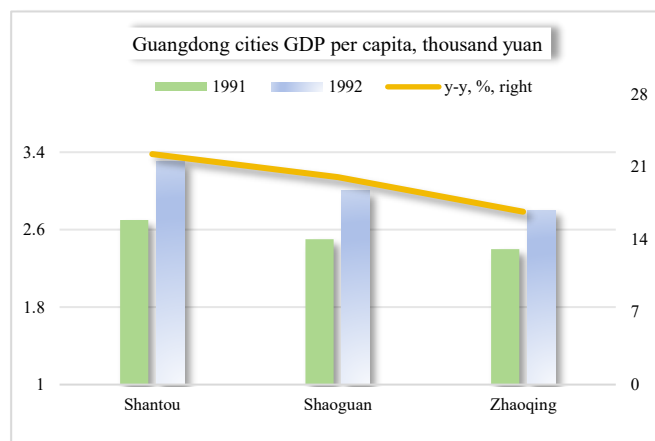

Figure 6 The Guangdong cities GDP per capita I [4]

At final, The Guangdong cities GDP per capita might show 9 & 7 thousand yuan by Shantou & Zhaoqing cities in 2000 accordingly in terms of Figure 7 to exhibit their moderate economy status. The y-y value might show 20% & 18% by them respectively explained their fastest development steps.

Figure 7 The Guangdong cities GDP per capita II [4]

### 3. Conclusions

The exportation goods will be included in total GDP value with a certain rate as a tertiary industry, so the more exportation goods kinds and amount will determine one nation's tertiary achievement partly. With regards to the more exportation kinds & amount will help us to attain the increasing GDP content because the more surplus can be gained by us. Thereby, the foreign exportation & importation total amount may represent one nation goods positively active status that may help our GDP amount to increase with high degree. With producing more high-technique product our those kinds product can wield more and more influence on the entire GDP's high-technology products with their industrial chains getting more completeness and maturity skill for making high-end and green ones sustainably. Therein, we need to grasp the whole procedure skills as soon as early because it may create more high-quality and low-cost ones at final. On the other hand, the cities GDP can reflect those big urban with first-line, second one even third one will become an important effectiveness to the provinces even the nation, which let us emphasize their potential entities like metropolitan Beijing Shanghai Guangzhou & Shenzhen cities whose GDP value may record the highest scale for us to estimate and work there since there will be more opportunities and money to earn and invest. Shanghai & Shenzhen stock exchange center will exhibit huge monitor to express the stock index change for many of us to consider its money chance. At the same time, there must be many talents to join the work position at the high-end-product making manufacturer after they finished the subject education with certain skills recruited by maker human resource department in famous factories. So that we need to continue to support them especial in AI and automatic equipment that may bring up many new experiences to follow the global developed field for making more innovation product like family robot factory one and store one etc. many occasions for the more convenient applications and payment machine in big malls.

### Funding

This work was supported by the Korean Science & Engineering Fund (KSEF) at the granted No. 96-0300-11-01-03 under the Specialized Basis Research Program.

### Ethic Declarations

The authors declared that there were not conflicts of interest.
