Article History	Abstract
Original Research Article	<p><i>The high-technique product like big plane, new pharmacy &amp; quantum technology will occupy an important position for us to chase continuously due to their owning high intensive knowledge with all of the a series of subsidiary electronic parts for the sake of maintaining its stability and high-level performance. So that so many scientist and scholars will put their attentions to those high-function product research and development in university &amp; institutes with publishing their many papers in the high level journal in order to push their endeavour and gain relevant achievements to those cutting-edge-fields. Hence, the more achievement from them will be breakthrough continually that is in front of us constantly. At the same time, more modern ones will be emerging in our surround for us to enjoy the automatic product to bring up the convenience &amp; precision service. So that those products like mobile phone realized 5G time for preparing the 6G is urged in the next that will be smarter than ever time with map guided track if we lose the way and direct us to the unknown destination. Another one will be Wechat that having the telephone and communication functions for us to proceed business selling behavior like Taobao net where the anticipating good can be searched and found conveniently and directly. On the other side, the trade behavior will become more urgent tasks lie in front of our many sale companies like new energy vehicle that is emerging one using electric power to drive with chargeable plug-in in several decade minutes for completing 90% battery fullness. So much high-tech achievement can be attained by scientists and scholars through wielding their wisdom in exploring advancement technique ocean, the future development direction is to be planed with strategic drawing by our scientist and economists. We should continuously insist in ascending suggestions and make the idea to become the actual one by constantly processing that one in laboratory and research &amp; development department through excellent graduate and employee from university and other maker. Therefore, the high-technique department and corporation will enhance the product making capacity frequently upgraded constantly to ensure their performance stability and security</i></p>

*&longevity at the end in order to improving GDP raising value and rate year by year that may promote our entire live atmosphere and comfortable degree. Meanwhile, the high advancement product will exhibit at the public occasions for us to evaluate goodness and badness so as to improve our multi-functions and long term stability and equipment security &efficiency in the end. [1~25]*

**Keywords:** *an Innovation searching, analyzing the Jilin &Heilongjiang GDP, China Stocks changes, by Sustainability.*

## 1. Introduction

The high-technique product and skill will become more significant than ever because AI(artificial intelligence) technique replaces the automatic and man-work flow-lines in a maker largely according to News report. So that those high-tech skill will transform into the product making ability may occupy a more important task for our scientist and engineers to deal with. Therein, the many AI Robots have to enter the maker workshop to efficient work for men will be prevalent and low cost. At the same time, the AI Robot making makers will stand in the mount peak to proceed all kinds of experiment trials and expand those function software and hardware that may be instructed collaboratively by the university PhD who grasped some important message. Through contacting those cooperation experiment with parameters like temperature, time and deviation scope grasping conditions might be exhibited between them which may play an important effectiveness on how to produce the new product more precisely and having low-cost features. Another one will erect the product equipment like processing machine, automatic flow-equipment which may be depending on the out-source-enterprise with the demand condition. Then the scientists will give his opinions to the deviation endurance which makes the possible making capacity upwards and looks forwards to enduring more time without main error.

The tertiary industry would involve on service business like high-technique-service office for enterprises influence in one region whose making purchase order and complaint so as to request more orders from the maker in neighbor maker and sale centers. They will transfer message from the ultimate customer to factory for improving their some function continuously as a consultation company. On the other hand, the whole GDP increasement might influence the tertiary one reversely due to enough income could raise our consumption capacity, special in service business. However the which business we could proceed the GDP factors will be enhanced from their physical &brain labors. Thereby, whatever you pursued the certain dedication to our society progression at all.

At the end the tertiary one role is made strong more and more when seeing the GDP value, therefore more and more stores and offices will be allocated in city for the sake of acquiring more information about their products.

Meantime, the special sale stores will be much than ever like Huawei handphone and i-pad even portable computer which is a high-light in a department lobby. Their aim at increasing sale amount is one aspect firstly, then sell EV etc. new concept electric auto is two one. As we knew the price difference between them might attain more than 50 times. So that the perspective will be watched special in the tertiary industry which may create more profitable mediate-life consumption less than ten years. Maybe after decade the humanoid robots would enter our life like family, coffee store &canteen in light of present tendency and development, so we might share the automatic time in advance. [1~29]

## 2. Discussions

Through improving GDP value with all aspects of proceeding much endeavour and conquest by our scientist and professors the our convenient live will be acquired with those contribution to our society enlarged level. Hence, we are to continuously process our resolution to utilizing new-quality-productivity with new technique special in interdisciplinary field contribution for the sake of eventually eliminating contamination source from the carbon atmosphere in earth. Therefore, the less cultivation from minerals for maintaining low-carbon atmosphere protecting the cherish natural resource for another usefulness will be urgent task met in front of our progression paces. Therefore, the improving our live condition might be formed and the only thing for us to process will become specialized for many new subjects to study in schools in advance. Hence the advancement subjects can be created by our constant endeavour with different subjects combined by inter-disciplinary ones which may become an important measure to be learned and developed by us from now on.

### 2.1 Jilin &Heilongjiang GDP comparison

The Jilin &Heilongjiang GDP comparison might show 264 &448 billion yuan correspondingly in 2004 according to Figure 1 exhibited Heilongjiang province modest economy momentum with about 1.7 times variation among them. The y-y value might indicate 10% &13% by them accordingly explained the latter Heilongjiang one upward enlargement pace.

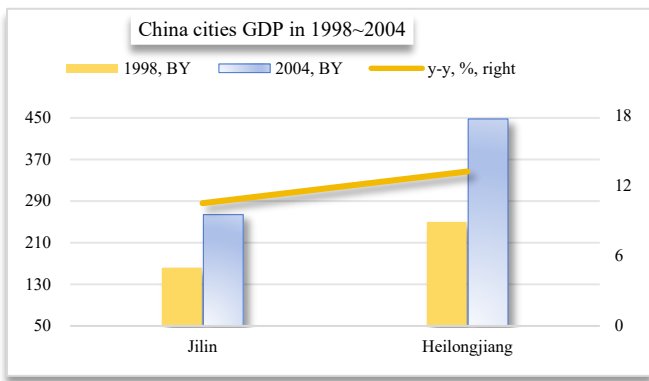

Figure 1 Jilin & Heilongjiang GDP comparison. [1]

At the same time, the Jilin & Heilongjiang GDP comparison might show 1,497 & 1,687 billion yuan correspondingly in 2025 according to Figure 2 exhibited Heilongjiang province modest economy momentum. The y-y value might indicate 2.7% & 1.2% by them accordingly explained the latter Jilin province more upward growth pace than the former Heilongjiang one.

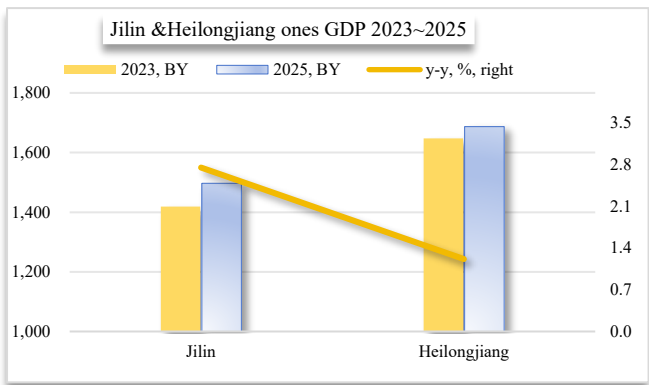

Figure 2 Jilin & Heilongjiang GDP comparison I. [1]

At the same time, the Jilin & Heilongjiang GDP comparison might show 50 & 79 billion yuan correspondingly in 1991 according to Figure 3 exhibited Heilongjiang province modest economy momentum. The y-y value might indicate 16% & 14% by them accordingly explained the latter Jilin province upward enlargement pace than the former.

Figure 3 Jilin & Heilongjiang GDP comparison II. [1]

On the other hand, the Jilin & Heilongjiang GDP comparison might show 41 & 61 billion yuan correspondingly in 1989 according to Figure 4 exhibited Heilongjiang province modest economy momentum with around 1.5 times variation among them. The y-y value might indicate 33% & 21% by them accordingly explained the former Jilin province most upward enlargement pace.

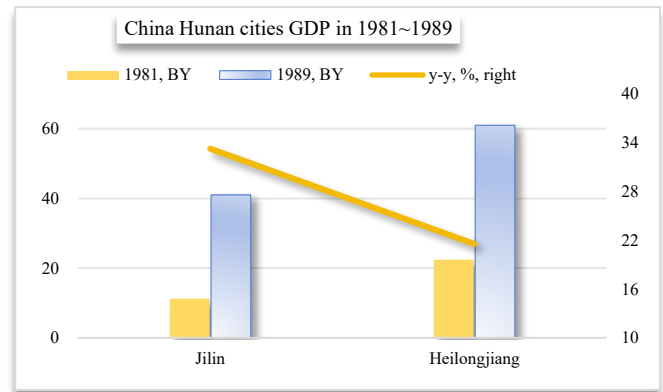

Figure 4 Jilin & Heilongjiang GDP comparison III. [1]

## 2.2 Stocks price changes

The recent stocks price changes situation might show 3.1%~ -0.3% by <Zhijiang Bio> & <Maide Medical> correspondingly to exhibit <Yanmai Tech> high increasing pace with 4.6% according to Table 1. The most lowest one would be <Hengyu Huanbao> with -1.8% raising pace.

Table 1 The recent stocks price changes situation I. [2]

Name	Price, yuan	Increasing rat, %	Name	Price, yuan	Increasing rat, %
Zhijiang Bio	19.7	3.1	Yanmai Tech	89	4.6
Caifu Trend	116.5	1.6	Hengyu Huanbao	76.5	-1.8
Mengsheng Electron	32.6	2.3	Maide Medical	17	-0.3

## 2.3 Subject on the International Journal of Recent Advances in Multidisciplinary Research

It calls Scholars, Engineers, Academicians, Scientists, Industrial professionals and Researchers from all over the

world to submit their original articles for inclusion in our upcoming issue. All submissions will be reviewed and evaluated based on originality, technical research, and relevance to journal contributions. The International Journal of Recent Advances in Multidisciplinary Research

(IJRAMR) highly welcomes theoretical, technical, research, as well as empirical papers from all areas of research in the area of technology innovation and emerging trends. All the accepted articles will be published in the upcoming issue of the journal ISSN. All manuscripts must be submitted as email attachments in Microsoft Word. Deadline for submissions is open. Contact with authors, including acknowledgment of receipt of manuscripts, will occur by email. A separate cover page should be attached that includes the title of the article, the author's name, e-mail address, phone number, mailing address, affiliation, and one-sentence biographical statement. [3] Therefore, we are delighted to invite your submission to us for the sake of commonly developed both sides with quickness after passing the peer-reviews.

Summarily, the citizen consumption behavior will be important one aspect, hence we should earn much money from investing capital on the financial dealing direction for the sake of getting more investment opportunity with our reserved money, like entering stock market and estate investment etc many aspects. With regards to increasing GDP value the more chance for us to deal with will become multi-type and diversifying-types time, therefore we need to catch the chance to become treasurer dream more clearly. Hence we can process the investment behavior from now on with learning more knowledge to invest theory from video application software and practical-books in details. Thereby, the more capital flow will affect the GDP enhancement continually for our life to become more positively and enjoyments than ever any-time. Our learning knowledge will become treasure in financial investment after we prudently consider the risk burden capacity that will become the dynamic for our investor to proceed sustainably. [30~33]

### 3. Conclusions

The high-technique product like big plane, new pharmacy & quantum technology will occupy an important position for us to chase continuously due to their owning high intensive knowledge with all of the a series of subsidiary electronic parts for the sake of maintaining its stability and high-level performance. So that so many scientist and scholars will put their attentions to those high-function product research and development in university & institutes with publishing their many papers in the high level journal in order to push their endeavour and gain relevant achievements to those cutting-edge-fields. Therefore, the more achievement from them will be breakthrough continually that is in front of us constantly. At the same time, more modern ones will be emerging in our surround for us to enjoy the automatic product to bring up the convenience & precision service. So that those products like mobile phone realized 5G time for preparing the 6G is

urged in the next that will be smarter than ever time with map guided track if we lose the way and direct us to the unknown destination. Another one will be Wechat that having the telephone and communication functions for us to proceed business selling behavior like Taobao net where the anticipating good can be searched and found conveniently and directly. On the other side, the trade behavior will become more urgent tasks lie in front of our many sale companies like new energy vehicle that is emerging one using electric power to drive with chargeable plug-in in several decade minutes for completing 90% battery fullness. So much high-tech achievement can be attained by scientists and scholars through wielding their wisdom in exploring advancement technique ocean, the future development direction is to be planed with strategic drawing by our scientist and economists. We should continuously insist in ascending suggestions and make the idea to become the actual one by constantly processing that one in laboratory and research & development department through excellent graduate and employee from university and other maker. Therefore, the high-technique department and corporation will enhance the product making capacity frequently upgraded constantly to ensure their performance stability and security & longevity at the end in order to improving GDP raising value and rate year by year that may promote our entire live atmosphere and comfortable degree. Meanwhile, the high advancement product will exhibit at the public occasions for us to evaluate goodness and badness so as to improve our multi-functions and long term stability and equipment security & efficiency in the end.
